

YAZAN AL SHAMAKHI

Cyber and Information Security Analyst

Muscat, Oman | +968 79997834 | y7n@outlook.it

Portfolio: y5k.github.io/portfolio

PROFESSIONAL SUMMARY

Motivated Cybersecurity Analyst with a Bachelor of Technology (B.Tech) in Information Technology – Cyber and Information Security at UTAS. Experienced in network administration, cybersecurity operations, Linux and Windows Server management, vulnerability assessment, SIEM deployment, and blockchain development. Skilled in implementing defensive security controls, troubleshooting enterprise networks, and developing automation solutions using Python, Bash, and Solidity.

TECHNICAL SKILLS

- **Cybersecurity:** SIEM, Security Monitoring, Log Analysis, Vulnerability Assessment, Tenable Nessus, WAF, Firewall Configuration, Threat Detection, SOC Operations.
- **Networking:** TCP/IP, OSI Model, Routing, Switching, Network Design, Network Security, Troubleshooting, zero trust network access.
- **System Administration:** Windows Server, Active Directory, Group Policy, Linux Administration, DHCP, DNS, NFS, HTTP Services, Office 365.
- **Programming & Development:** Python, Bash, JavaScript, PHP, SQL, HTML, Solidity.
- **Blockchain:** Ethereum, Smart Contracts, dApps.
- **Operating Systems & Support:** Windows 10/11, OS Installation & Troubleshooting, Hardware Troubleshooting, System Diagnostics, PC Maintenance.
- **Research & Documentation:** Technical Research, Security Research, Report Writing, Technical Documentation, Microsoft Word, Excel, PowerPoint, Data Analysis, Presentation Development.

TECHNICAL PROJECTS

Cybersecurity Home Lab & Infrastructure Hardening:

- Built dedicated cybersecurity home lab environments to conduct rigorous security testing, infrastructure hardening, and network administration.
- Deployed centralized SIEM solutions and configured host-based endpoint agents for real-time monitoring and log aggregation.
- Conducted vulnerability assessments using Tenable Nessus to identify, analyze, and remediate system misconfigurations.

Network Security & System Administration

- Configured custom WAF policies, perimeter firewall rules, and secure network segmentation to protect local application deployments.
- Administered Windows Server infrastructures with Active Directory (AD) and Group Policies, alongside Linux servers running DHCP, NFS, and HTTP web services.
- Automated routine system tasks and network operations by engineering custom Bash scripts and Python utilities.

Blockchain Development:

- Architected functional blockchain dApps and deployed secure Ethereum smart contracts using Solidity programming.

CERTIFICATIONS

- Cisco IT Essentials: PC Hardware and Software (2021)
- Cisco Introduction to Networks (2022)
- Oracle Database Programming with SQL (2022)
- Cisco Switching, Routing, and Wireless Essentials (2023)
- Cisco Enterprise Networking, Security, and Automation (2025)
- Cisco Network Security (2025)
- Cisco JavaScript Essentials (2025)
- Cisco Linux 1 (2025)
- Cisco Cyber Threat Management (2026)

EDUCATION

- Bachelor of Technology (B.Tech)
Information Technology – Cyber and Information Security
University of Technology and Applied Sciences (UTAS)
2020–2026
GPA: 3.09
